Work Experience

System & Security G1 Technologies – Nov 2024 to Present

Leading IT infrastructure and operations across multi-site environments, including Windows Server (2019/2022), Active Directory, GPO, DHCP/DNS, and firewall configurations. Managing hybrid cloud integrations with Microsoft 365, Entra ID (Azure AD), Exchange Online, and endpoint security (Defender, Symantec).Developing and deploying automation scripts in PowerShell for onboarding, backup, remote diagnostics, and policy enforcement. Overseeing enterprise printer management (Canon, Kyocera, Brother), including network deployments, driver rollouts, and GPO mapping. Driving continuous optimization of system performance, user experience, and endpoint stability through proactive scripting, tuning, and hands-on remediation. Restoring and repurposing failed endpoints onsite, including hardware diagnostics, part replacements, imaging, and full redeployment to production environments. Supporting dual-boot Windows/Linux systems (Linux/Windows) with custom ISO builds and field deployments. Collaborating closely with internal teams (engineering, development, support) and external vendors to streamline IT operations and enforce configuration standards.

Senior Technical Support Representative - MalamTeam – Nov 2022 to Apr 2024

Maintained 30+ organizational servers, including legacy systems such as Exchange 2003 and Windows Server 2012–2022.
Developed PowerShell automations for Active Directory tasks, identity lifecycle management, and permission delegation.
Utilized PRTG for real-time monitoring and remote support platforms like BeyondTrust and Zoho Assist.
Provided cross-platform support for macOS, Apple devices, and Microsoft enterprise infrastructure.
Collaborated effectively across IT and support teams using Monday.com for task coordination and SLA tracking.

IT Support Technician
Afeka Tel Aviv Academic College of Engineering – Dec 2021 to Jun 2022

Delivered full-stack IT support: OS deployment, account provisioning, Zoom/AV setup.
Operated hybrid classrooms, tested AV setups, and ensured live session readiness.

Education & Certifications

Cyber Security Expert – 600 hours, including hands-on training with the TAME™ Range simulator by ELTA-IAI *(2025)*

Cybersecurity & Network Infrastructure Training – KERNELiOS Cyber Knowledge Center (2017)
Covered areas: system setup with scripting, intrusion detection/prevention, threat response, and vulnerability assessment

Professional Summary

Proactive and detail-oriented IT leader with a strong cybersecurity background and hands-on experience managing hybrid Windows/Linux environments. Adept at scripting, automation, and infrastructure hardening. Fast learner, strategic thinker, and team-first mindset. Expert in Windows Server, PowerShell, Microsoft Cloud, and modern endpoint security.
